About the program

The Junior Fellowship Research Abroad is a **two-year program** aimed at strengthening research and study exchanges **between Slovenia and other countries**, enabling talented Slovenian students to fully realize their potential.

In the first year of the program, students undertake a **10-week research visit** at a university or research institution in their field of study/professional expertise. Additionally, fellowship recipients engage in activities organized by ASEF, including research projects and collaboration with other scholars, leadership and career development workshops, as well as attending regular public lectures and other events organized by ASEF.

My research visit to the Luxembourg Centre for European Law was everything I could have wished for. Under the mentorship of Prof. Dr. Verica Trstenjak and additional guidance from Prof. Pierre-Henri Conac, I had the privilege to work with some of the best minds in EU law. This experience has been incredibly fulfilling, and I am immensely thankful to both professors for their support.

My research visit to Texas Tech University under the guidance of Dr. Klementina Fon Tacer was an invaluable experience. Not only did I gain significant professional knowledge, but I also made lifelong friends, learned to be more independent, and discovered what truly makes me happy. I'm deeply grateful to ASEF for this opportunity and to Dr. Fon Tacer for her kindness, exceptional mentorship, and warm welcome.

My research visit to the University of Chicago with Dr. Luka Pocivavsek was the perfect conclusion to my medical studies. This experience added significant depth to my education and introduced me to many new acquaintances. I'm grateful to Dr. Pocivavsek, Dr. Cao, and Prof. Kocijancic for their time and mentorship, and to ASEF for making this opportunity possible. A special thanks also to my loved ones and new friends in Chicago for their support while I was abroad.

"My 10-week research visit in California was a deep dive into the world of molecular biology, focusing on the essential enzyme Rnase P. The collaborative environment, fostered by Dr. Jernej Murn and fellow researchers, was inspiring and broadened my perspective on modern scientific methodologies. This experience will undoubtedly shape my future academic and professional journey in biomedicine."
